SMART INDIA HACKATHON 2025

TITLE PAGE

- **Problem Statement ID –SIH25049**
- **Problem Statement Title-**AI-Driven Public Health Chatbot for Disease Awareness
- **Theme-**MedTech / BioTech / HealthTech
- **PS Category- Software**
- **Team ID-**SMEC81
- **DEV-RAG**

DEV-RAG

IDEA TITLE

Aarogya Saathi - Your AI Health Companion

Features

- Symptom guidance & care advice
- Reminders (vaccine, intake and stock of medicines)
- Outbreak alerts (govt. DBs)
- Preventive care tips

Proposed Solution

- Info Gap → 24/7 trusted info
- Language Barriers → Multilingual support
- Misinformation → Verified, govt.-aligned

Unique Value

- **Proactive**: API-integrated, hyper-local alerts
- **Accessible**: WhatsApp + SMS for all users

RAG

TECHNICAL APPROACH

SMART INDIA HACKATHON 2025

Component	Technology / Process	Purpose
1. User Interface	WhatsApp Business API & Twilio SMS API	Enables users to interact via chat on any mobile phone, from basic to smart.
2. Core Logic	**NLP Engine:** Rasa / Dialogflow **Backend:** Python (Flask)	To accurately understand user queries in multiple Indian languages and process the request logic.
3. Data Layer	**Databases:** PostgreSQL & MongoDB **APIs:** Government Health Portals	To store our vetted health information and retrieve live, official data like outbreak alerts.
4. Deployment	**Infrastructure:** Docker & AWS / Google Cloud	To ensure the chatbot is scalable, secure, and available 24/7 to all users.

DEV-RAG

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2025

❖ **Feasibility, Risks & Strategies**

Feasibility

- **Technical:** Scalable NLP + cloud (AWS/GCP)
- **Operational:** Uses WhatsApp/SMS → no install barrier
- **Economic:** Low cost per user, high ROI

Key Risks & Mitigation

- **Data Accuracy** → Validation + offline knowledge base
- **User Trust** → ASHA/community endorsements, empathetic tone
- **Low Literacy** → Simple UI + menu options
- **Privacy** → Data laws compliance, encryption, anonymization

DEV-RAG

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2025

Impact Analysis & Projected Benefits

Impact (on Target Audience)

- **Health Autonomy:** Validated info → informed personal/family health decisions
- **Democratization:** 24/7 confidential access via WhatsApp/SMS
- **Proactive Action:** Vaccination reminders & outbreak alerts
- **Equity:** Multilingual + UI bridging literacy/language gaps

Projected Benefits

- **Social:** ↑ Health literacy, ↓ misinformation, better health indicators
- **Economic:** ↓ PHC burden, ↓ family healthcare costs via prevention
- **Governance:** Scalable health comms + real-time insights for policy
